

KAVISHKA DESHAN

SOFTWARE ENGINEERING UNDERGRADUATE

Sri Lanka | deshank962@gmail.com | [Portfolio](#) | [LinkedIn](#) | [GitHub](#)

+94 701218929

Summary

Full-Stack Developer and Software Engineering undergraduate at the National Institute of Business Management (NIBM), Sri Lanka, seeking a Software Engineering Internship to build real-world applications and contribute within an experienced engineering team. Experienced through academic and personal projects in responsive web and mobile development, API integration, database design, cloud services, IoT systems, testing, and deployment. Hands-on with React, Next.js, TypeScript, Flutter, Node.js, Microservices, Firebase, Supabase and MySQL, with a focus on clean, maintainable software and strong user experience.

Technical Skills

Programming Languages

Java, JavaScript, TypeScript, C, C#, SQL

Backend & APIs

REST APIs, API Integration, Node.js, Spring Boot, Web Services, Microservices

Databases

MySQL, SQLite, PostgreSQL, Firebase Realtime Database, Oracle

IoT & Embedded

Arduino, ESP32, Embedded C/C++, RFID, Sensor Integration, I2C/SPI

Core Concepts

Object-Oriented Programming (OOP), Data Structures & Algorithms, RESTful API Design, Database Design

Frontend & UI

React, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Cloud & DevOps

Firebase, Supabase, GitHub Pages, GitHub Actions, CI/CD

Mobile Development

Flutter, Android, Kotlin

Tools & Development

Git, GitHub, VS Code, IntelliJ IDEA, Android Studio, Arduino IDE, NetBeans, Power BI, Postmen

Projects & Experience

Aarya Tea — Brand & Product Website [GitHub](#)

Personal Project (Client)

Next.js, React, TypeScript, Tailwind CSS, GSAP

- Designed and developed a **bilingual product-marketing website** for a tea brand using the **Next.js App Router** with React and TypeScript.
- Built responsive, **theme-aware layouts** in **Tailwind CSS** and added **scroll-linked animation** with **GSAP** to walk visitors through the product range.
- Published the site as a **static build on GitHub Pages**, with **GitHub Actions** running the build and release automatically on every push.

Portfolio Website [GitHub](#)

Personal Project

Next.js, React, TypeScript, Tailwind CSS, Framer Motion

- Built a **responsive personal portfolio** with **animated project showcases**, **theme-aware UI**, and interactive sections using **Next.js**, **React**, **TypeScript**, **Tailwind CSS**, and **Framer Motion**.
- Implemented a **working contact form** and direct contact links, then deployed to **GitHub Pages** with a **custom domain** and automated **GitHub Actions workflow**.

Navora — Intelligent Travel Guide to Sri Lanka [GitHub](#)

HND Final Project

Flutter, Dart, Firebase, Supabase, Gemini

- Built a **cross-platform travel application** that plans trips across Sri Lanka from **real routing and place data**, so each itinerary follows an actual travel route instead of an unordered list of locations.
- Integrated **Gemini** through **Firebase AI Logic** to generate narration and travel context for the places along a planned route.
- Implemented **maps**, saved trip storage, **offline caching**, and **AR-style navigation** so the app stays usable while travelling with weak network coverage.
- Added community features including **trip sharing**, **encrypted chat**, and **blockchain-verified reviews** to keep shared feedback trustworthy.

Smart Mining Helmet — IoT Safety Monitoring [GitHub](#)

Group Project

ESP32, Arduino C++, React, TypeScript, Firebase

- Contributed to an **IoT worker-safety platform** built on **ESP32** firmware written in **Arduino C++**, reading environmental and motion sensors mounted on a helmet unit.
- Implemented **RFID zone tracking** so the system records which section of the site a worker is in at any given time.
- Streamed telemetry into **Firebase Realtime Database** and built a live **React and TypeScript dashboard** for supervisors to monitor workers.
- Added **SOS alerting** and **incident logging**, so an emergency raises an immediate alert and remains in the history for later review.

Library Management System [GitHub](#)

Academic Project

Java, Swing, JDBC, MySQL, JasperReports

- Developed a **desktop library-management application** for cataloguing books, managing student records, and handling book issues and returns.
- Implemented **database-backed authentication**, book search, **stock tracking**, and due-date monitoring on top of a **MySQL** schema.
- Structured data access with **JDBC and the DAO pattern**, and generated printable **PDF reports** using **JasperReports**.

Education & Training

BSc (Hons) in Software Engineering

Currently Following

National Institute of Business Management (NIBM), Sri Lanka

Current Stage: Higher National Diploma (HND)

Relevant coursework: Software Engineering, Object-Oriented Programming, Database Management Systems, Computer Networks & Security, Data Structures & Algorithms, Machine Learning, Deep Learning, Artificial Intelligence.

- **Expected Graduation:** 2028
- **Current GPA:** 3.25 / 4.00

Language Skills

Sinhala — Native language

English — Working proficiency
